

Zwint-Flox

Nomenclature	C57BL/6Smoc- <i>Zwint</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Zwint	Synonyms	Zwint-1, D10Ertd749e, 2010007E07Rik, 2600001N01Rik
	NCBI ID	52696
	MGI ID	1289227
	Ensembl ID	ENSMUSG00000019923
	Human Ortholog	ZWINT

Model Description

These mice carry loxP sites flanking target exons of Zwint gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Zwint gene.

*Literature published using this strain should indicate: Zwint-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
