

Stk10-Flox

Nomenclature	C57BL/6Smoc- <i>Stk10</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Stk10	Synonyms	Lok, Gek1, mKIAA4026
	NCBI ID	20868
	MGI ID	1099439
	Ensembl ID	ENSMUSG00000020272
	Human Ortholog	STK10

Model Description

These mice carry loxP sites flanking target exons of Stk10 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Stk10 gene.

*Literature published using this strain should indicate: Stk10-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
