

Zzef1-Flox

Nomenclature	C57BL/6Smoc- <i>Zzef1</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Zzef1	Synonyms	NSPA, C85424, BC051585, mKIAA0399, 8430405D05Rik, C130099L13Rik
	NCBI ID	195018
	MGI ID	2444286
	Ensembl ID	ENSMUSG00000055670
	Human Ortholog	ZZEF1

Model Description

These mice carry loxP sites flanking target exons of Zzef1 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Zzef1 gene.

*Literature published using this strain should indicate: Zzef1-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data

No data
