

Akt1s1-Flox

Nomenclature	C57BL/6Smoc- <i>Akt1s1</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Akt1s1	Synonyms	Lobe, Lobel, PRAS40, AI227026, 1110012J22Rik
	NCBI ID	67605
	MGI ID	1914855
	Ensembl ID	ENSMUSG00000011096
	Human Ortholog	AKT1S1

Model Description

These mice carry loxP sites flanking target exons of Akt1s1 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Akt1s1 gene.

*Literature published using this strain should indicate: Akt1s1-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
