

Ddx41-Flox

Nomenclature	C57BL/6Smoc- <i>Ddx41</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Ddx41	Synonyms	ABS, AA958953, AI324246, 2900024F02Rik
	NCBI ID	72935
	MGI ID	1920185
	Ensembl ID	ENSMUSG000000021494
	Human Ortholog	DDX41

Model Description

These mice carry loxP sites flanking target exons of Ddx41 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Ddx41 gene.

*Literature published using this strain should indicate: Ddx41-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
