

Tie1-Flox

Nomenclature	C57BL/6Smoc- <i>Tie1</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Tie1	Synonyms	TIE, tie-1, D430008P04Rik
	NCBI ID	21846
	MGI ID	99906
	Ensembl ID	ENSMUSG00000033191
	Human Ortholog	TIE1

Model Description

These mice carry loxP sites flanking target exons of Tie1 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Tie1 gene.

*Literature published using this strain should indicate: Tie1-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
