

# NCI-H2030

## Strain Information

Cat. NO.	NM-F20
Cell Line	NCI-H2030
Strain State	Validation of tumorigenic capacity completed
Model Description	H2030 is a cell line exhibiting epithelial morphology that was isolated in 1988 from the lungs of a non-smoking male with non-small cell lung cancer.  *Literature published using this strain should indicate: NCI-H2030 cell line (Cat. NO. NM-F20) was purchased from Shanghai Model Organisms Center, Inc..

## Validation Data

Fig1. Morphology of H2030 cell line.

A

B

Fig2. Analysis of Tumorigenesis in M-NSG mice (n=5) . A Tumor volume was measured by time. B Body weight was simultaneously checked.

\*Wild-type cell lines are not for sale, and only applied to construction of tumor bearing mice and in-vivo efficacy studies.
