

A-431

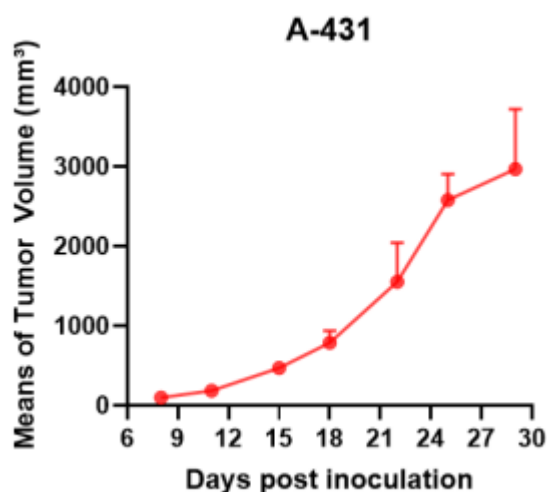

Strain Information

Cat. NO.	NM-BP01
Cell Line	A-431
Strain State	Validation of tumorigenic capacity completed
Model Description	A-431 is a cell line exhibiting epithelial morphology that was isolated from the epidermis of an 85-year-old female patient with epidermoid carcinoma.
	*Literature published using this strain should indicate: A-431 cell line (Cat. NO. NM-BP01) was purchased from Shanghai Model Organisms Center, Inc..

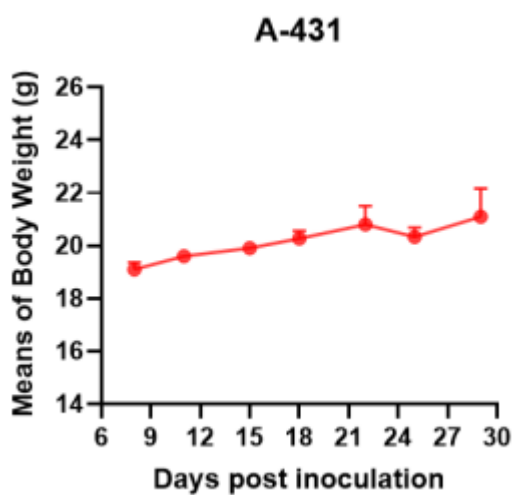

Validation Data

*Wild-type cell lines are not for sale, and only applied to construction of tumor bearing mice and in-vivo efficacy studies.
