

786-O

Strain Information

Cat. NO.	NM-SA01
Cell Line	786-O
Strain State	Validation of tumorigenic capacity completed
Model Description	786-O cells were derived from a 58 year old male caucasian with a primary clear cell adenocarcinoma. *Literature published using this strain should indicate: 786-O cell line (Cat. NO. NM-SA01) was purchased from Shanghai Model Organisms Center, Inc..

Validation Data

Figure 1. Morphology of 786-O cell line.

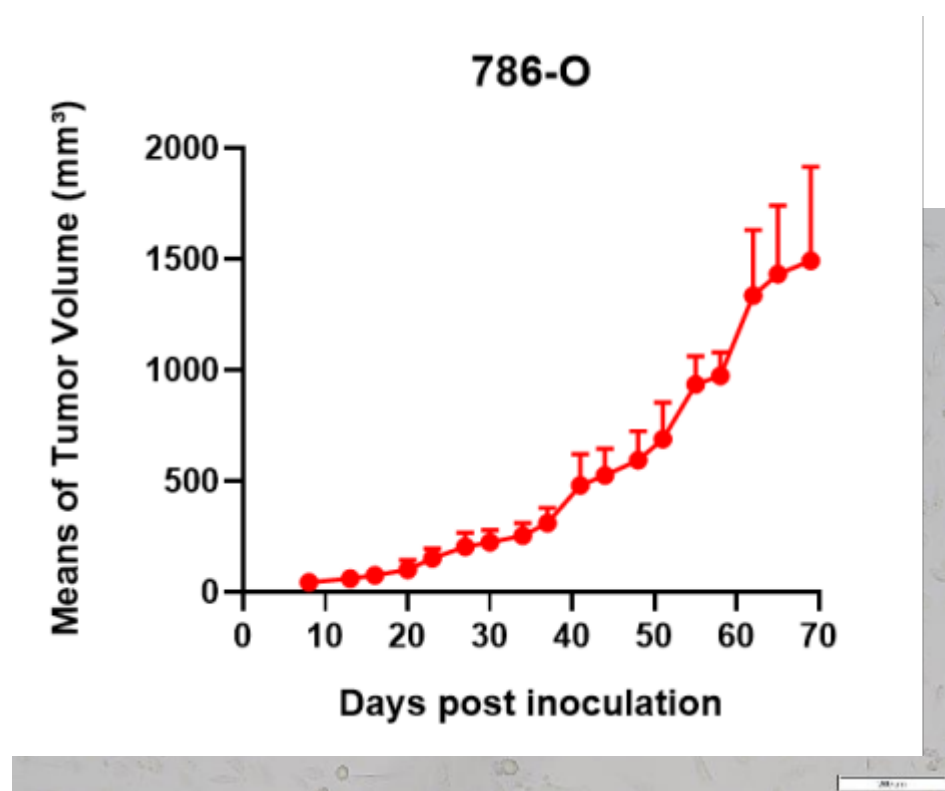

Figure 2. Average growth curves of 786-O tumors. (n=5)

786-O cells were subcutaneously injected into M-NSG mice.

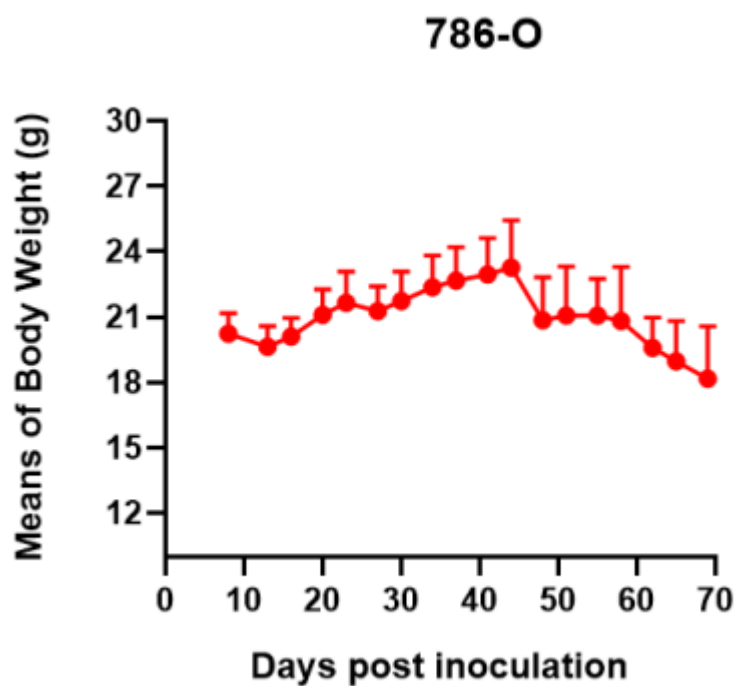

Figure 3. Body weights of 786-O xenograft mouse models. (n=5)

*Wild-type cell lines are not for sale, and only applied to construction of tumor bearing mice and in-vivo efficacy studies.
